Dedicated CAD CAM Training Center

WHO WE ARE

Dental Technology, a very integral part of the dental profession. A Dental Technologist works according to the prescription of the dentist for each patient. Without the service offered by a Dental Technologist, dentists would not be able to offer the full range of services to their patients. Technical skill and a high level of manual dexterity are essential skills for this profession.

The Department has a distinguished tradition of excellence in teaching, research, bringing together globally competent academicians, outstanding researchers, exemplary students and state - of -art facilities through the program Bachelor In Dental Technology.

The professional caliber of our graduates makes them to meet the noble aspirations of dental professions. The Department is proud to have alumni who occupy prominent roles in various national wide organizations.
